The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Cook (5719070).

At column 4, lines 4-63; and column 5, lines 39-41, Cook teaches a device having a chip 48, first electrodes 12 formed on the chip, barrier metals formed on the first electrodes and having laminated structures, and a plurality of second protruded electrodes 22, which serve as external connection terminals, formed on the barrier metals, wherein the barrier metals comprising: a lowermost conductive metal layer 16 laminated on the first electrode, the lowermost conductive metal layer having a cooperatively good joining property with the first electrodes; an intermediate conductive metal layer 18, 20 laminated on the lowermost conductive metal layer, the intermediate conductive metal layer comprising one or more layers and having a comparatively good joining property with the lowermost conductive metal layer, the intermediate conductive metal layer having at least one layer serving as a barrier layer for

preventing the protruded electrodes from diffusing into the intermediate conductive layer; and an uppermost conductive metal layer 24 laminated on the one or more intermediate conductive metal layers, the uppermost conductive metal layer being made of a material which easily alloys with the material of the intermediate conductive metal layers.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
